[Linkedin](#)

## PROFILE SUMMARY

Software Tester with 2 years' experience in automation and manual testing (Selenium, Postman, API testing) and a solid understanding of Python/Django code. Delivered quality across web apps and software like Agua Spark, CASBIRO, LedgerGate, Sahakari, and Bookify. Strong in technical communication, code analysis, client interaction, and eager to advance AI automation and leadership responsibilities. Also experienced in poster designing for project needs.

## SKILLS

- **Languages:** Python, JavaScript, HTML5
- **Frontend:** CSS
- **Backend:** Django
- **Technical Skills:** Manual Testing, Writing and executing test cases, Test Plan / Test Strategy creation, Security Testing basics, Database Testing (SQL queries, data validation)
- **Tools:** Git, GitHub, Postman, Figma, Canva, Selenium
- **Bug Tracking:** JIRA, Trello, Bugzilla
- **Other Skills:** Poster Designing, UI/UX Designing
- **Soft Skills:** Analytical Thinking, Problem Solving, Team Work, Self Motivation, Strong communication (with devs clients)

## PROFESSIONAL EXPERIENCE

**Quality Assurance Tester**  
Agua India

*June 2023 - Present*

- Performed manual and automation testing on multiple projects, including web applications, websites, and software systems such as Agua Spark, CASBIRO School Management, LedgerGate, Sahakari, and Bookify.
- Designed and executed test cases, developed test plans, and managed defect tracking using tools like JIRA, Trello Bugzilla.
- Conducted API testing using Postman and automated regression suites using Selenium, ensuring high product quality.
- Collaborated closely with developers to debug issues efficiently, leveraging knowledge of Python and Django for code readability and technical discussions.
- Communicated directly with clients to gather feedback, suggest improvements, and ensure project requirements were met.
- Contributed to enhancing testing processes with a focus on introducing AI-based automation solutions.

**Python Developer Intern**  
Soften Technologies

*March 2023 – May 2023*

- Completed a foundational internship that marked the beginning of my career in technology, providing exposure to software development and testing concepts.
- Developed and maintained web applications using Django and Flask, focusing on building features and enhancing user experience.
- Gained valuable experience in debugging, code optimization, and collaborating with development teams.
- This internship helped strengthen my technical understanding and motivated my transition into software testing with a deeper appreciation for code quality and functionality.

## PROJECTS

### CASBIRO School Management(Two applications And Dashboard)

- Wrote and executed test cases for core modules like attendance and grade management.
- Conducted API testing (Postman), database validation (SQL), and regression testing after updates.

### LedgerGate CMA Academy (Web Application, Mobile App, Dashboard)

- Performed manual testing with focus on UI/UX consistency across devices (mobile, tablet, laptop).
- Verified responsiveness and layout compatibility across browsers and screen sizes.
- Tested exam modules, including question display, timer functionality, scoring logic, and report generation.

### Sahakari Race Plus (Web Application, Mobile App)

- Performed manual testing of coaching platform for various Kerala Public Service Commission (KPSC) exam preparation.
- Tested functional modules including mock tests, question banks, and result reports.
- Reported defects and worked with developers to ensure smooth user experience for students preparing for government exams.

---

**Leave Management System (Personal Project)**

*Technologies: Python, Django, HTML, CSS*

- Designed and developed a web-based Leave Management System for tracking and managing employee leaves.
- Built features for leave application, approval workflow, and leave history reports.
- Implemented role-based access for admin and employees.
- Focused on clean UI and responsive design using HTML and CSS.
- Ensured backend validation and data consistency through Django models and views.

**EDUCATION**

|                                                                                |                |
|--------------------------------------------------------------------------------|----------------|
| <b>Master of Computer Application (MCA)</b><br>SRM University, Chennai         | 2024 - Ongoing |
| <b>Bachelor of Computer Application (BCA)</b><br>University of Calicut, Kerala | 2020 - 2023    |
| <b>Higher Secondary, Computer Science</b><br>SKHSS, Guruvayoor                 | 2018 - 2020    |

**ACTIVITIES**

- **College Union Chairman (2023):** Elected Chairman of *Eunoia*, the official student union of Paramekkavu College, through campus-wide democratic elections. Served as primary liaison between the student body and college administration. Spearheaded initiatives, including organizing 7 key programs to enhance student engagement and campus life.
- **10th NCC Cadet (2018):** Participated in National Cadet Corps (NCC) activities, demonstrating discipline, teamwork, and leadership qualities through various camps, drills, and community service initiatives.
